End-to-end GitHub enablement with agentic intelligence

As a Microsoft Cloud Solution Provider (CSP), UST accelerates AI-native software engineering with GitHub adoption and usage. We help streamlined migrations, activate Copilot, and enterprise-wide enablement with seamless licensing, expert services, and agentic automations that turns intent into impact.

GitHub Copilot enablement

Fast-track GitHub Copilot adoption for growing teams

On-demand enablement and support service for GitHub Copilot. We help teams get up and running quickly, use Copilot securely, and build internal momentum without the overhead of full-time consulting or complex enterprise programs.

Onboarding workshop — Kickstart adoption with a live, expert-led session covering Copilot setup, use cases, and secure usage guidelines.

On-demand support — A expert team of consultants to support developer enablement, policy setup, integration help, or usage questions.

Admin and policy guidance — Ensure Copilot is configured correctly with support for enterprise controls, user management, and GitHub best practices.

Copilot strategy playbook — Actionable recommendations to align Copilot usage with business goals, improve ROI, and expand adoption across your team.

UST PACE GitElevate

GitHub strategy, consulting, architecture and concierge services

- Developer productivity including transparency and reporting
- SDLC blueprints and best practices
- Event driven architecture
- Support and administration

UST PACE GitLift

Agentic and AI-driven modernization into GitHub

- Repo migrations - Perforce, IBM, TFS, SVN, CVS, and legacy tools modernization
- Build and deployment modernization into GitHub (GHEC, EMU, etc)
- Scalable workflow migrations

UST PACE StageCraft

AI powered pipeline migration

- Declarative pipelines as code
- Integration into enterprise systems
- GenAI based modernization and port of custom automation
- GHAS enablement

UST's GitHub certified professionals bring technology and domain expertise together

UST delivers full-stack GitHub services from Copilot, Actions and Advanced Security, to Admin setup and foundational enablement, making it easier to become AI-native in your software engineering and delivery.

100+

GitHub certifications completed
(GitHub Architects, Administrators and Engineers)

CASE STUDY - AI-FIRST SDLC MODERNIZATION

Perforce to GitHub migration

Technology client

Driving the modernization of the customer's software development lifecycle into an AI-first operating model by embedding GitHub advanced features including CoPilot within modern SCM architecture, DevOps practices, and cloud technologies.

Accelerates business capability delivery, reducing time-to-market, and creating a lasting competitive advantage.

Successfully modernized the customer's software delivery by porting repositories and workflows from **Perforce to GitHub** and establishing a robust, scalable automation framework. Using **AI (CoPilot)**, **300+ legacy** automations were analyzed and modernized, resulting in reusable components such as PR templates, **Waterfall and Backport workflows**, LFS handlers, and **CI/CD pipelines**.

This transformation significantly increased developer productivity, accelerated build and deployment cycles, and SOPs produced setting the stage for enterprise migration out of Perforce into GitHub.

45%

Uplift in the agility of migration

65%

Reduction in overall manual effort cost

80%

Reusability of workflows across different products

Foundational use cases for Agentic AI within SDLC

At UST we believe technology engineers a better future

Together, we build for boundless impact

Born digital, UST transforms lives through the power of technology. We walk alongside our clients and partners, embedding innovation and agility into everything they do.

We don't innovate for technology's sake - we create transformative experiences and human-centered solutions that drive meaningful, positive change for a better world.
