

U S T

The UST approach to Epic for health plans - Enterprise health plan suite

1

Foundation

DATA STRATEGY, INTEGRATION AND CLOUD INFRASTRUCTURE

UST builds the technical backbone

Environment provisioning, data pipeline architecture, large-scale data migration, cleansing and normalization from legacy payer systems.

2

Interoperability

PROVIDER-PAYER CONNECTIVITY ENABLEMENT

UST configures and deploys real-time data exchange between your health plan and provider networks

Mapping workflows, building integrations and ensuring claims, making authorizations and clinical data flow seamlessly.

3

Member experience

DIGITAL ENGAGEMENT ACTIVATION

UST designs and launches your member-facing digital experience

Benefits visibility, cost transparency, provider search, and secure messaging to reduce friction and call center dependency.

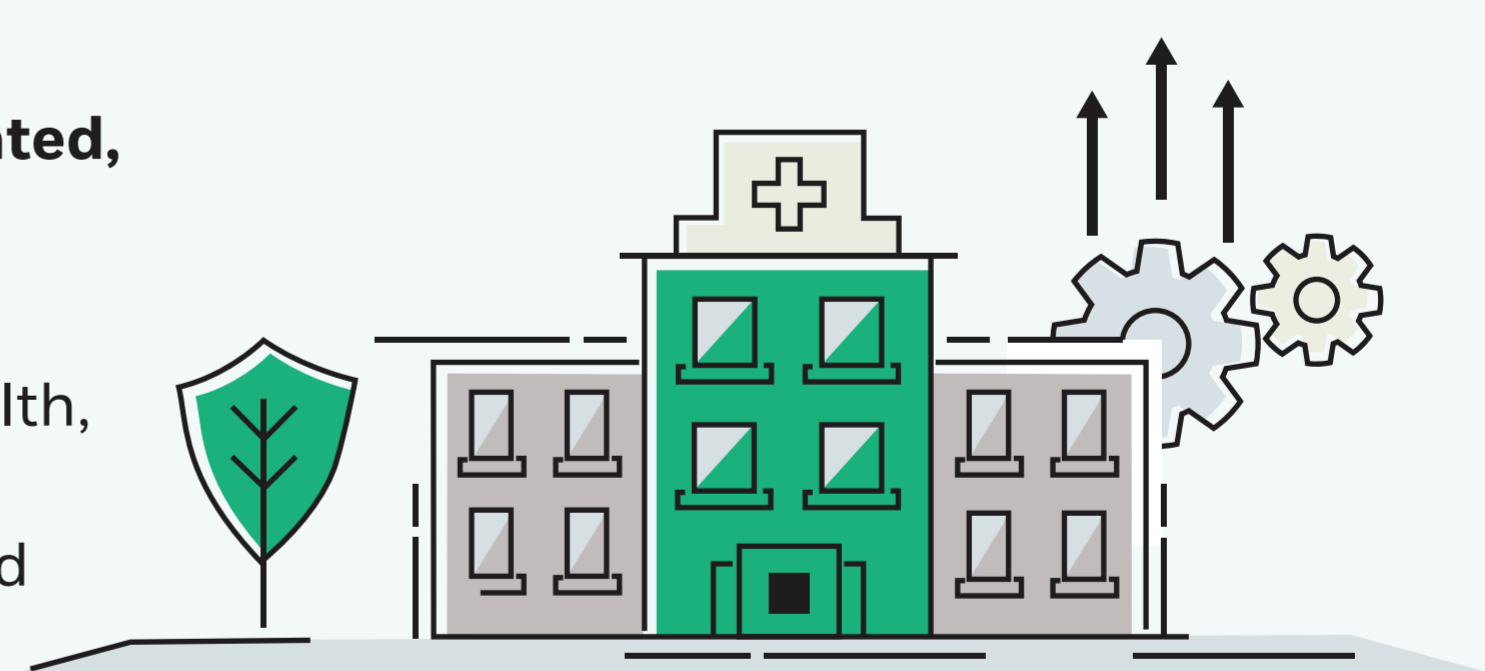

4

Value realization

MEDICAL MANAGEMENT AND UM OPTIMIZATION

UST translates your clinical and operational policies into automated, data-driven workflows

For utilization management, care management and population health, enabling faster authorization decisions, lower medical costs and better quality scores.

5

Operationalization

CORE ADMINISTRATION AND MANAGED SERVICES

UST modernizes claims adjudication, enrollment, and benefits administration

Staying on as your managed services partner to continuously operate, optimize and evolve your payer operations.
